

Our clinicians have grown to appreciate our **pioneering approach**

A case study of Swift Dental's valued clinician, **Eye & Dental Clinic.**

Services you have used...

We have used Swift's Crown & Bridge and Prosthetics services since we opened our dental practice back in June 2018.

What are the benefits of collaborating with Swift?

Excellent work, easy to work with, and not too expensive.

Eye & Dental Clinic provide advice and treatment on all aspects of dental care from General Dentistry to Hygienist Services, Cosmetic Dentistry, Implants and Teeth Whitening.

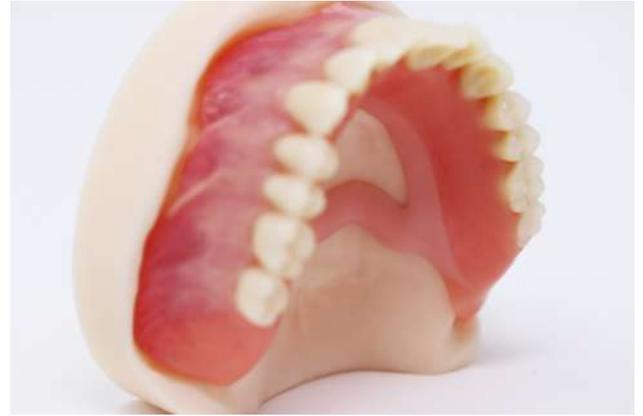

Have our services and products improved your dental processes?

Yes, I have used Full-Form Zirconia, Valplast and Acrylics on many occasions and they have definitely made a difference to our practice.

Would you recommend Swift?

Yes, we highly praise Swift Dental to our colleagues.

Without Swift, we wouldn't be able to provide high-quality Dentures and Crowns to our patients.

Do you think as a company we are visible and approachable?

Yes and yes! Swift Dental is so well known amongst dentists and highly praised within the industry.

Do you find us financially competitive in the industry?

Yes, Swift offers a competitive pricing structure and gives good value for money, especially their digital products. Also, we see a lot of offers on their Valplast and acrylics...

Have you attended any of Swift's events? If yes, which ones?

Yes, we attended the most recent one at Manchester Stadium with Avinash, and it was an excellent event which was very informative of new materials and innovative products to use from a dentists' point of view.

The clinician's challenges...

The main challenges from our point of view are not having more than one pickup am and pm slots.

Swift's solution to these challenges..

Having more drivers and more delivery pick up slots, both am and pm, would definitely suffice.

Swift have always maintained an excellent working relationship with our practice, and have always gone that extra mile for us.
